

Software SST is used by latching the IRQ line permanently low.

Uses the same cable setup as found on the ZX Spectrum +3, with EAR is data from tape to computer - MIC is data out to tape.

RC6802 Microchicken computer as explained in the book "22 Micro-computer projects: To build, use and learn" by Daniel Metzger. UI board implements 7segment output, tape input/output, single-step circuit and keypad.

Components for keypad (in favor of an external one), tape and the 74LS73 (for SST) can be left out if not needed.
